DETAILED ACTION

- 1) Claims 1-67 are presented for examination.

Election/Restrictions

- 2) Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-15 and 59-67, drawn to a method of selecting a chemical product based on water hardness, classified in class 700, subclass 266.
 - II. Claims 16-58, drawn to a method of controlling a utility device with a graphical user interface based on analyzed parameters, classified in class 700, subclass 17.

- 3) The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as choosing chemicals from a list of available chemicals. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- 4) A telephone call was made to David Wier on 10/6/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
